

## Update on Strategic Plan

The “List Committee” thanks everyone who sent items for inclusion in the strategic planning process. Below is a list of those suggestions received over the course of the past week.

They appear in no particular order and have been arbitrarily sorted into categories. We hope it makes the list easier to read.

Collecting the List is Step 1 of the project. In Step 2, the Board will prioritize items in consultation with other Boards, past volunteers, staff and professional service providers. The historic record shows an impressive volunteer effort on the part of many residents to preserve the Village over the course of many years.

Step 3 will involve creating plans to address the prioritized issues.

The Committee will be happy to incorporate all suggestions into the List. Please email to the following address:
